YOUR MISSION

Inside this folder you will find a few inconspicuous DocX files. These DocX files are the source of much grief in my life 😣

ARE YOU UP TO THE CHALLENGE?

Your task is to fill in these documents with new information. There are two sets of documents. 1. An employment agreement for hiring an employee 2. An NVCA Standard agreement meant for a fundraising round. Both are incredibly common documents for a lawyer to markup.

HOW TO SUBMIT?

Once you have your docs marked up, send your docs (and code) in the same folder structure you've been given to me@mitchellhynes.com. You can ask me some questions there too.

Any submission that satisfies the requirements will guarantee an interview at Spellbook.legal, the leader in AI Contract Reviews.

EMPLOYMENT AGREEMENT

Your task is to take a prompt like so:

> **"Change the name in all documents to "Amy Alpha" and adjust her salary to $100,000"**

> **"Remove mention of stock options in the Employment Agreement"**

And create new DocX files with the text changed.

NVCA STANDARD

This is the hardest one. Big brownie points if you can get it even **slightly working**. These documents are finnicky and frankly, terrifying.

Your task is to

> **take the Term Sheet attached and markup the NVCA contract's template tags to match the information in the Term Sheet**

As an example,

Before:	After:
THIS SERIES A PREFERRED STOCK PURCHASE AGREEMENT (this "Agreement"), is made as of **[_____], 20[__], by and among [_____]**, a Delaware corporation (the "Company"), and the investors listed on Exhibit A attached to this Agreement (each a "Purchaser" and together the "Purchasers").	THIS SERIES A PREFERRED STOCK PURCHASE AGREEMENT (this "Agreement"), is made as of **August 1, 2024, by and among Acme Motors, Inc.**, a Delaware corporation (the "Company"), and the investors listed on Exhibit A attached to this Agreement (each a "Purchaser" and together the "Purchasers").

[Template] *TAGS* __CAN__ [_have_] MANY {forms}. Basically, it's meant for a human to input information, so it's not made easy for us and trying to parse these out using regex will send you down a rabbit hole.

My favourite example are alternatives. They're formatted like so:
[Alternative 1:

WHEREAS, concurrently with the execution of this Agreement … *]*

[Alternative 2:

WHEREAS, concurrently with the execution of this Agreement,…*]*

WHEREAS, as of the date hereof, the Certificate of Incorporation…*]*

Isn't that awesome.

You're effectively meant to remove *Alternative 1* entirely and remove the square brackets around the *Alternative 2* lines too.

Thanks for playing!
